Future-B requirements for Hardware, IP addresses

WE PROVIDE THE BEST PRICES ON THE MARKET FOR OUR BRANDED QUALITY HARDWARE

For any 2 way satellite system, in order to have a fully working service you need to have the below Hardware:

You can either buy from us (recommended as we will only provide equipment that we have tested to be fully compatible together) or you can buy via your local reseller/retailer:

Required for 1 full working system	1 x iDirect modem
	1 x LNB for the Rx signal (for reception from the Satellite) and adapted to the specificities of the satellite you are using.
	1 x BUC (Block Up Converter) for the Tx signal (for transmission to the satellite) and adapted to the specificities of the satellite you are using
	1 x two way satellite dish , that could be between 0.5 M up to 3/4 M, but for our satellite we are in the range of 0.96 M to 1.8 M dish
	2 x cables (2 cables) for connection between LNB and BUC mounted on the Satellite dish to your iDirect modem in your house/offices
	1 x mount + stand or support for the dish (provided locally, we provide the fixation with the dish) depending on where you are setting up your dish.
